## PERSONAL PROJECTS

### Public telephone directory (07/2022 - 08/2022)

- I work in public telephone directory just for practise.

### School management system (04/2022 - 06/2022)

- This is my term project I used PHP in backend and HTML, CSS and bootstrap in frontend [https://github.com/harry-88/school\\_management\\_system](https://github.com/harry-88/school_management_system)

### Data entry software (12/2021 - 01/2022)

- Basically this is the paid project of a small NGO "Naseeb Marriage Bureau". The software is use to add data of bride and groom in the database of the NGO.

### Student Management System (06/2022 - 06/2022)

- This project is made in simple HTML, CSS, Bootstrap & PHP. This is my term project. It has limited functionalities.

### Renaming the files (08/2021 - 08/2021)

- This software is basically use to rename multiple files in a folder. I give the services of my software in HR department of Bata Pakistan.

### Software for Departmental Store (08/2020 - 09/2020)

- My friend and I made a software that we can use in the departmental store. We just made this software for self-learning. The technologies that we used are java and javaFx.
